

---

Seville Malaga Cordoba

In a will to increase our presence in the european transport area, we have created an **Andalusian business group** named **ASP GROUP**.

**ASP GROUP** is composed by companies from the transport sector as **AUTOTRANSPORTES SAN SEBASTIAN** and **AUTOBUSES PACO PEPE**, companies with more than 50 years experience in the passengers transport activity. In **ASP GROUP** we work adapting ourselves to our customers needs, through the efficiency and the professionalism of our teams and anticipating to equip our fleet with the ultimate security measures, comfort and new technologies.

We have our own facilities and fleet of buses in **Sevilla, Málaga and Córdoba**. We also have agreements with renowned coach companies in other locations, which makes us guarantee their services in the whole country, always with the same quality standard.

## OUR TEAM

Our project, **based on our employees**, is always looking for our clients satisfaction, **by treating them in a direct and personalised way**, so that they can feel we are working and applying ourselves to make their trip **comfortable, safe and nice**.

The introduction of the continuous training system for our staff guarantee the quality of our service; and our update in customer attention techniques, in safe and efficient driving, in new technologies and in safe work.

### Continuous Training

- Safe and efficient driving
- Basic mechanics knowledge
- Tachographs and new legislations

### + 700 hours/year training

- Customer service
- Workplace hazard prevention
- Professional Ability Certificate (CAP)

## OUR FLEET

We have a wide fleet of **more than 180 buses**, from **16-seaters to 72-seaters**, of the main brands and models.

We have established certain goals within our clients satisfaction policy (so that they can be aware of):

**Security:** set up of a real “preventive maintenance” program for the fleet, which guarantees the reduction of the standstills due to a breakdown.

**Comfort:** we try your trip to be nice and comfortable, providing our vehicles with intelligent suspension, bus height elevation for getting in/off the bus, wide entrance and inside, automatic air conditioning, ambience sound for cabin and driver, three point belt-seats.

**Accessibility:** all the new vehicles, acquired during the last years, are adapted to disabled people.
